

**Startup
Weekend**

Powered by Google for Entrepreneurs

Part of the team to be in

During international week of entrepreneurship 2016 I partook in Copenhagen Startup Weekend AR/VR as my first Startup Weekend event.

54 intense hours filled with interesting engagements, masterclasses in startup and the project itself.

When we began our weekend none of us had anticipated just how much we would achieve - our team of seasoned business hustlers, engineers and developers were able to escalate our vision; AR ray - Augmented Reality safety vision.

We were recognized as the overall winners and are now further developing.
